

*"Very professional, knowledgeable, responsive and cooperative.  
A pleasure to work with"*

# EDUCATIONAL FACILITIES

K2 Audio's staff have been designing audio/video systems and providing acoustical guidance to educational facilities for decades. Whether the technical systems are in classrooms, auditoriums, commons areas or sports venues, we specialize in providing each project with a design that incorporates the most appropriate technologies and products. Proper acoustics design creates the desired level of isolation between spaces, prevents unwanted noise from inhibiting the learning process, and ensures that the instructor can be heard clearly. Properly designed audio/visual systems assist with the presentation of materials, and can enable students in remote locations to participate via distance learning systems.

When you work with K2 Audio, you benefit from the talents of our entire team. The following is a selected listing of our relevant staff experience in the Education sector. Make K2 a part of your next project.

## SELECTED STAFF EXPERIENCE
